

Dear Friends of Peace, Freedom and Justice all around the world;

I am Lodu Sein win a Journalist and former Political prisoner from Burma. I am sending his message to you to request your kind help in fighting against tyrants all over the world. Right now, the brave people of Libya, Syria, Yemen and other middle east countries have risen up against the brutal dictators of their respective nations and to our heartfelt regret we found that hundred of people have been killed everyday by those dictators. They urgently need help from the world.

We Burmese people also have been continuously fighting for our freedom for fifty years and still we are hopelessly far away from the end of our destination. During the course of this long journey thousands of innocent souls have been slain on the streets and many hundreds have been killed ~~the~~ in the prisons. Right now more than 2000 people, especially young students, monks and women are still in the prisons. They need help. Your help.

7.5.2011

Many a times I have been wondering whether our world is gradually approaching the dooms day. Everyday we are watching cruelties and brutalities, injustices and killing everywhere around the world. People in millions are crying for help.

More than half of the world people are living under various dictatorships, deprived of all their basic human rights and suffering unbelievable miseries. Hundreds of thousand of people around the world are trying their best to answer the calls of the suffering souls.

Many people turn to their respective governments and the so called world body; the United Nations. They sympathized with the unfortunate souls, condemn the tyrants and initiated hundred of resolutions. That's all. The tyrants and dictators oppress more and kill more to protect their power.

To tell the truth I have in my whole life never witnessed dictators voluntarily relinquish Power. Ferdinand Marcos and Suharto have been forced out. Now Mubarak have been forced out, Tunisia regime have been forced out. All of them have been ousted not by the UN and not by the democratic governments. And also not by guns. The power of the ordinary citizens of the respective nations toppled them down.

Personally I have no trust in the UN and no trust in the governments. They all are only paying lip service to democracy and unman rights and freedom, peace and justice. The only thing they care about is trading, investment and profits. They will shake hands with the devil if the devil's pocket is full of money.

Presently hundreds of thousand of ordinary people around the world are trying hard to help the suffering people. Many civic and religious organization, INGOS and activists are also working to that end. If we can organize those different groups to coordinate their efforts and resources for the common cause, we can even challenge the heaven.

Various Burmese exile groups have for long advocated the withdrawal of TOTAL oil company from Burma, French nationals supported them and joined their demonstrations. Some legislators and intellectuals urged the French government in vain. If we go directly to the people all over Europe and asked them to boycott the TOTAL gas stations the company will come to our turns.

I would like to ask all people of the world to unite and formed "People Power world wide" (PPww) in your country, in your city and in your community to work for peace, freedom and justice in our humanity. All civic and religious organizations, rights groups aids groups, advocacy groups should co-ordinate their activities for our common cause.

Thanks You.
